EACC Process and Guidelines

Priorities (in approximate order):

- Regulatory/compliance
- PeopleSoft bundle updates
- System momentum/value
- Student benefit
- Faculty benefit
- Staff benefit (time, labor, and cost savings)
- Public image
- Reducing noise (the simpler fixes)
- Maintaining the progress and functioning of ConnectCarolina

Projects not considered critical:

- One-offs and/or those with limited impact

Guidelines

1. The standard of review must encompass all units
2. A group understanding of an integrated system, everything impacts everybody
3. A group consensus on the assignment of resources
4. A group understanding that one data system is not likely to solve all problems
5. Many university operations are dependent on EACC to be included
6. Some decisions made one or two years ago can (and should) be revisited
